Firebase authentication

Section 9

In this section

- Authentication setup
- Implement email/password sign in
- User registration
- Social login
- Security rules intro

Firebase authentication

Tighly integrated with Firebase services

Token based. Uses JWT.

Email and password login

Support for many social login providers

Can use custom authentication

Firebase Users

Unique ID (uid)
Email Address
DisplayName
PhotoURL

The goal of this section

Summary

In this section

- Authentication setup
- Implement email/password sign in
- User registration
- Social login
- Security rules intro

So, is it secure?

Yes. Very.

ID Tokens signed by Google with private key

Tokens expire after 1 hour

Refresh tokens are stored securely, only accessible to firebase SDK
